Private-Label Market Leader

We have created new quality standards and deadlines for the development of Private Label projects.

The high quality of products is achieved through European raw material suppliers from Poland, the Czech Republic, and the UK as well as our state-of-the-art in-house laboratory and the dedicated quality assurance unit responsible for supervising the quality of our finished products. The compliance with the international quality standards has been confirmed through independent audits performed by METRO, Fozzy Group, and ATB.

Our company is ISO 9001:2015 certified
